

# Tablet Mobile NoteTaker

Take your handwritten notes while being away from your computer

## NEW

## Pegasus Digital Pen

## Now available

## For Mac OS X users

### Benefits

- Mac Users can now take handwritten notes on any paper using Pegasus digital Pen that have the look & feel of any other regular pen during meetings, classrooms or at home away from their Mac.
- 50+ handwritten pages (A4) can be stored in the Digital Pen flash memory and then uploaded to Mac using USB cable connection.
- Rechargeable battery enables 10 hours continues writing.
- While connected to the Mac, users can use the Digital pen as mouse.
- Mouse functionalities enable to write notes into Mac iWork'08 applications and convert them to text, using built in conversion to text feature.
- The Digital Pen can be used for drawings inside applications such as Adobe® Illustrator®, Photoshop® Etc.

# Tablet Mobile NoteTaker

Pegasus' New Digital Pen supported under Mac OS X

## Product Description

The Tablet Mobile NoteTaker enables the user to capture handwritten notes or drawings while being away from the Mac and save the notes into the unit's flash memory. The Tablet Mobile NoteTaker has two operating modes: Mobile mode and Connected mode (on line).

- In Mobile mode The Tablet Mobile NoteTaker captures natural handwriting notes on plain paper and save them in its memory (over 50 A4 pages can be stored). USB cable enables easy upload of the saved notes to the Mac or Mac notebook. LCD display provides clear indication of operating mode.
- In connected mode the Tablet Mobile NoteTaker enables the user to work "Pen-Tablet-Mode", (mouse) utilizing the pen's hovering and mouse button functionality, to write directly into Mac SW applications such as iWork'08, Adobe® Illustrator®, Photoshop® and other known Mac applications.
